

Decommissioning support

Innovo offers major Engineering, Procurement, Construction and Installation (EPCI) companies in the offshore energy and marine industries demolition tools, engineering support and qualified personnel for decommissioning operations offshore.

Bespoke engineering and skilled operational services

Our expert team of engineers and operators provide clients with bespoke solutions to successfully tackle challenging decommissioning projects.

- Innovo's engineers study each project, design bespoke technical solutions and provide continuous support throughout the project
- Innovo's offshore personnel install, supervise and operate the decommissioning spread throughout each campaign.

Decommissioning tools

The reliability and performance of Innovo's equipment reduces cutting time compared to conventional cutting tools.

- Internal Cutting Tool (ICT) for inside platform pile cuts
- Diamond Wire Cutting Tools (DWCT) for external cuts
- Customisable internal and external dredging tools
- Specialised tools to address client needs
- Shear cutters (6 to 62-in.).
