

Quality Policy Statement

Innovo Engineering and Construction Limited provides engineering, project management, offshore contracting and products to the International Offshore Sector.

Headquartered in Aberdeen, we bring together a unique blend of sector experience and expertise, which provides a high quality service from a professional and multi-disciplined management and engineering team with a focus on safety, environment and quality in all aspects of our business.

We have developed and maintained an effective Quality Management System. We aim to deliver along with the collaboration of our partners' services and products in a safe and timely manner ensuring the highest operational standards.

We, as an organization have developed, implemented and do maintain a Quality Management System, which complies with the requirements of ISO 9001:2015 and is based upon the following principles:

- Continual improvement of all our business processes, products, services and operations.
- Enhancing our relationships with customers, suppliers, employees and other stakeholders.
- Meeting customer expectations in terms of performance, capability, reliability, quality and price.
- Satisfying all relevant product and safety standards and conforming to the requirements of all applicable regulatory authorities.
- Provide and maintain safe and healthy working conditions, equipment, systems of work for all employees. Furthermore, to provide any information, training and supervision as is required for this purpose.
- Ensuring effective Control of our suppliers and subcontractors.

The success of this policy depends on the company's ability to plan, implement and fulfil its objectives. These objectives are determined by management from various sources of information, both external and internal.

Processes are identified and implemented from these objectives and the process outcomes are measured against these objectives. Actions are taken to correct any shortfalls.

This policy along with the Quality Management System is reviewed for continuing suitability at regular intervals. Any change to the policy, management system or objectives are communicated to all personnel.

The Management
